

About Us

Blend Colours Pvt Ltd is a company powered by Innovation, Commitment to Customer satisfaction, Competitive Edge, Consistency in Quality, and Creativity in Production. We are one of the Top Manufacturers of Masterbatches located at Hyderabad, Andhra Pradesh,. We provide solutions to our customer's colouring problems and we are ready to accept the opportunity to develop any product for our customer in the shortest possible time. Even the most unusual requests that our customers come up with in the form of colour sample do not distract them from objective. Whatever your line of business you will find the solution from our extensive product range. We are active participant in the Plastic Association of Andhra Pradesh. BPCL has also been awarded with 1st Prize of PEARLS OF ANDHRA PRADESH by SSI Department for continuous growth since inception.

Product & Services

Our Product Range includes from White, Black, Colour, Additive, Special Effect Masterbatches & all types of Compounds. Our plants include state-of-art, fully computerised Twin Screw Extruders, dedicated for Black, White, Colours and Compounds, which produce products with superior and unchallenging quality, with total capacity of 14,000 Tons Per Annum. We are now boasting with highest capacity in India for Black Masterbatches, i.e. 5000 MT per annum with dedicated, high capacity and technologically advanced plants at Unit II, through which we can offer, quality superior to any other competitor in India.

Blend Colours also undertakes the activity for developing special Masterbatches & compounds with customer specification or requirement, with proven values. We also give technical suggestions on product development and replacement of existing material with alternate materials for reducing the costs.

Quality

In recognition of our efforts towards maintaining quality systems we have been awarded ISO 9001:2000 certification by TUV Management Consultants. The batches are tested on parameters like Dispersion, MFI, Colour Fastness, Density, and Filler content, Opacity, Whiteness, and Gloss etc. to maintain excellent consistency in every batch. The lab is also equipped with colour spectrophotometer

to achieve the exact shade of colour for demanding customer, and also with Flammability Rating Tester & Limiting Oxygen Index Tester, UTM for Tensile Strength & Flexural Modulus, Heat Deflection Tester (HDT), and Izod Impact Tester etc.
